GRABO ECOSAFE with PUR reinforced Easy Care Surface

Safety floors provide high protection against slippage due to the special composition and structure. Our new ECOSAFE floor range now also features our Easy Care PUR Reinforced Surface. Easy Care makes Ecosafe easy to maintain, whilst at the same time ensuring the safety properties and other technical performance benefits remain for a very long time. Additionally the new product also fulfills the Wet Test (>36) requirements of RRL Pendulum Test.

Graboplast Ecosafe with Easy Care is available from the 1st of July, 2014 in the usual colors.
